- Improved sound-absorbing effect
- Made from recycled plastic bottles
- 8 baffles per module
- Smart installation system
- Adjustable in height

Baffles	PET Felt
EasyGrid	Steel (Black)
Size	1200 x 1800 x 250 mm
Total weight	14 kg

ACOUSTIC DOUBLE BAFFLES SLANT

Double Baffles offer an effective acoustic treatment for interiors with exposed ceilings, such as open-plan offices, canteens and large halls. Slant is composed of sloping baffles that create a special optical effect. The hollow space inside the baffles improves their sound-absorbing effect, counteracting reverberation and echo.

PET FELT

PET Felt is made from recycled plastic bottles. A fiber is made from the finely ground bottles and this creates a soft, but sturdy felt. It lasts a long time, is easy to maintain and dampens noise. PET Felt can also be recycled. The PET Felt is available in 28 colours and fits into any interior.

COLOURS !

Slight colour deviations can occur since the PET Felt panels are made from recycled fibers. The panels have a frontside and a backside because the fibers are differently orientated on both sides, the nap direction. Keep in mind to apply the panels in the same direction and use the same side during the installation to avoid alterations in appearance.
