Baffles	PET Felt
EasyGrid	Steel (Black)
Size	1200 x 1800 x 220 mm
Total weight	14 kg

ACOUSTIC DOUBLE BAFFLES STRAIGHT

Straight Baffles are ideal for large, open spaces and exposed ceilings. For instance, open-plan offices, conference rooms and factory halls. Covering a large area, the baffles offer outstanding sound-dampening effect and minimise floor-to-ceiling slap echo. Due to the open pattern of the grid, the ceiling remains visible, creating a special visual effect.

PET FELT

PET Felt is made from recycled plastic bottles. A fiber is made from the finely ground bottles and this creates a soft, but sturdy felt. It lasts a long time, is easy to maintain and dampens noise. PET Felt can also be recycled. The PET Felt is available in 28 colours and fits into any interior.

COLOURS

Slight colour deviations can occur since the PET Felt panels are made from recycled fibers. The panels have a frontside and a backside because the fibers are differently orientated on both sides, the nap direction. Keep in mind to apply the panels in the same direction and use the same side during the installation to avoid alterations in appearance.
