Total weight	17.11 kg

ACOUSTIC BAFFLES PET WAVE

ReFelt Acoustic Baffles Wave offer a complete solution for acoustic ceiling systems. The cheerful waves almost give you the impression that you are underwater. The Acoustic Baffles absorb the sound and thus counteract reverberation.

PET FELT

PET Felt is made from recycled plastic bottles. A fiber is made from the finely ground bottles and this creates a soft, but sturdy felt. It lasts a long time, is easy to maintain and dampens noise. PET Felt can also be recycled. The PET Felt is available in 28 colours and fits into any interior.

COLOURS

Slight colour deviations can occur since the PET Felt panels are made from recycled fibers. The panels have a frontside and a backside because the fibers are differently orientated on both sides, the nap direction. Keep in mind to apply the panels in the same direction and use the same side during the installation to avoid alterations in appearance.
