| Weight per set | 1.94 kg |

ACOUSTIC PET FELT PANELS PARALLEL

With the Parallel panels, you can turn any wall into an intriguing work of art. Thanks to their tileable thru-cut pattern, the panels can be laid infinitely to seamlessly cover a surface of any size. Create a special 3D effect by applying a contrasting colour behind.

PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

COLOURS !

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch. Keep in mind that the panels have a nap direction on both sides. To avoid alterations in appearance, we advise to check the nap direction and mount the panels on the same side.
