- Great acoustic performance
- Sold per set of 4 or as a full panel

Material	PET Felt
Size	1200 x 600 x 9 mm
Weight per set	2.54 kg

ACOUSTIC PET FELT PANELS STREETS

Streets are reminiscent of intriguing road junctions, seen from above. Made from PET Felt using a v-cut technique, the panels have a soft texture and a gentle sound-absorbing effect. Thanks to their tileable design, Streets will cover any surface with a unique, continuous pattern.

PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

COLOURS !

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch. Keep in mind that the panels have a nap direction on both sides. To avoid alterations in appearance, we advise to check the nap direction and mount the panels on the same side.
