Reaction to fire classification	B-s1, d0

ACOUSTIC PET FELT PANELS POINTS

With its playful geometric expression, Points panels offer a ready-to-use solution for a patterned wall design. The panels are tileable and easy to install on any surface. Applying a contrasting colour behind the thru-cut panels will create a special visual effect.

PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

COLOURS !

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch. Keep in mind that the panels have a nap direction on both sides. To avoid alterations in appearance, we advise to check the nap direction and mount the panels on the same side.
