Weight	6.7 kg
Reaction to fire classification	B-s2, d0

PET FELT PANELS

Bringing new life to plastic bottles, PET Felt is a sturdy yet soft material perfect for walls, ceilings, or customised installations. The Refined Collection by ReFelt offers unmatched floor-to-ceiling dimensions, made from fire-retardant PET fibers in carefully curated colours. It provides incredible sound-dampening qualities, ensuring functionality and durability in any space.

PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

COLOURS

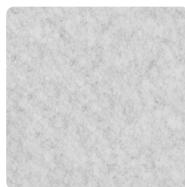

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch. Keep in mind that the panels have a nap direction on both sides. To avoid alterations in appearance, we advise to check the nap direction and mount the panels on the same side.
