## EASYRAIL ACOUSTIC BAFFLES TAPERED

This versatile acoustic system adapts effortlessly to a wide range of interiors. It features tapered PET Felt baffles with excellent sound-absorbing properties and a generous floor-to-ceiling height. Made from durable, fire-retardant PET, it suits both wall and ceiling applications.

## PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

## COLOURS

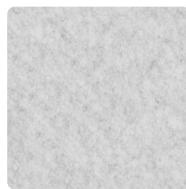

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch.
